

Day 1: Class Diagram

This UML class diagram outlines the structure of the Student model, defining its key attributes and the essential methods required for student management.

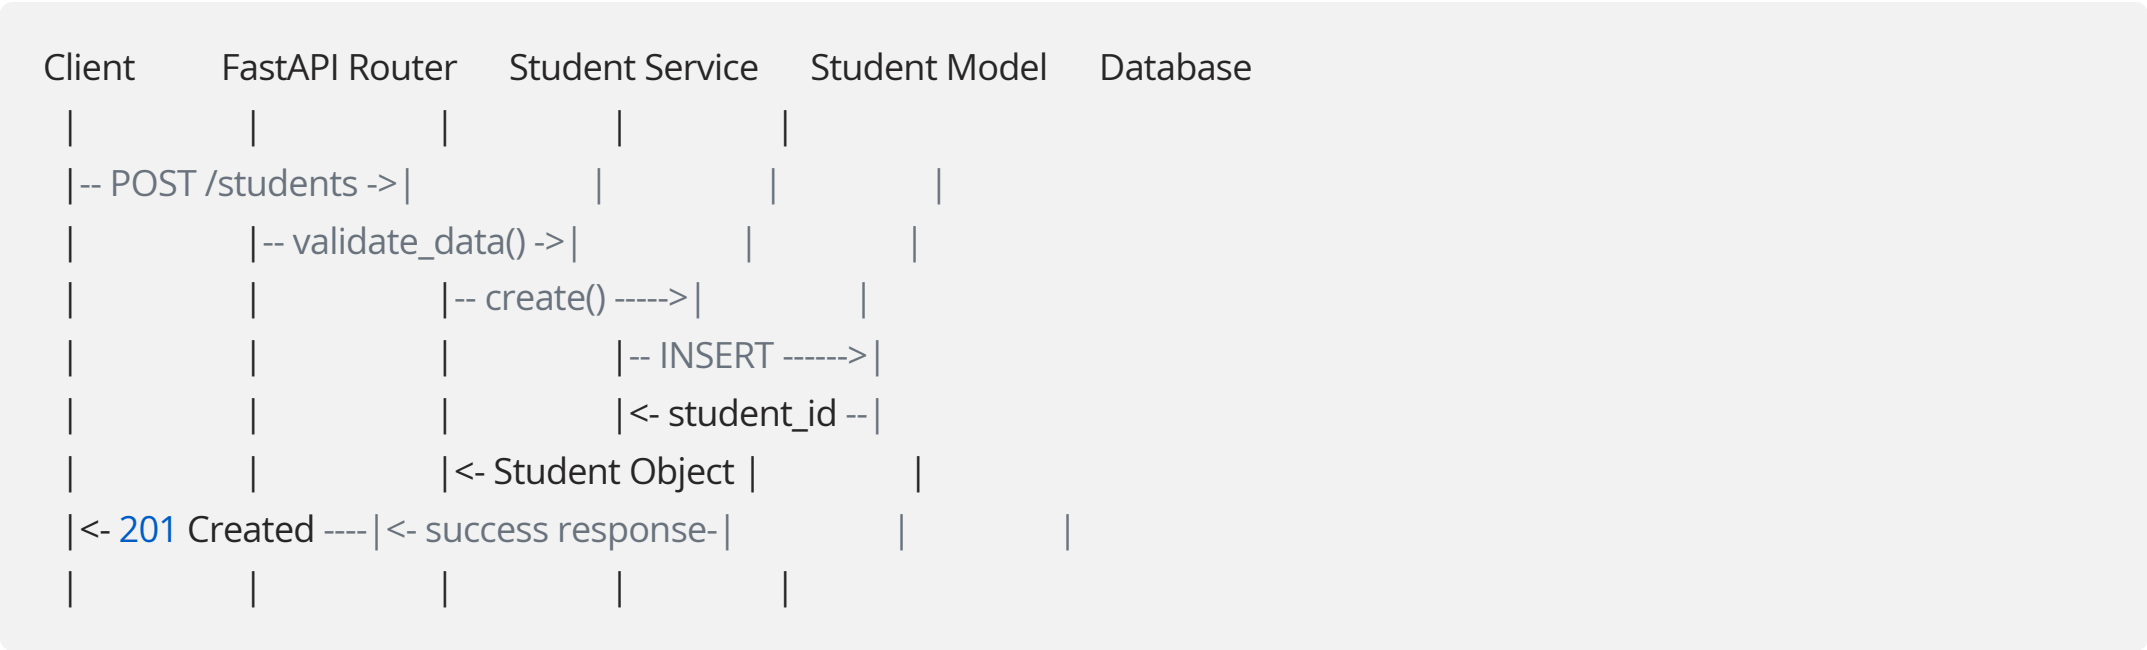

Day 1: Complete UML Diagram

This comprehensive diagram illustrates the system architecture for the Student Management system, including the core Student class, the FastAPI application interface, and the underlying database schema.

Day 1: Sequence Diagram

This sequence diagram illustrates the step-by-step interaction between system components during the student enrollment process, ensuring a clear flow of information and actions.

The diagram highlights the sequential calls and responses, beginning with the client's request and culminating in the database persisting the new student record and the system confirming the enrollment.
